VDM

‘We don’t inherit the earth from our fathers; we borrow it from our children.”

Native Americans motto

The environment: a responsibility for VDM!

The land where we live is "the resource" to be preserved today, not just for future generations.
VDM has always been searching for quality in the design and production of their products while respecting the environment.

We are firmly convinced that **the "sustainable" business development passes through the respect of the earth and its resources, in a conscious, coherent and responsible way.**

For this reason, **VDM pursues a policy of developing an Integrated Quality-Environment Management System,** which is continuously updated.

VDM was the first Italian company in the professional cleaning equipment sector to be certified:
UNI EN ISO 9001 and UNI EN ISO 14001.

Our responsibility takes the form of important choices.

The **EcoGreen brand identifies our products**, designed and manufactured with the aim of preserving the environment.

VDM EcoGreen solutions are innovative and versatile because they combine **high performances** with the use of a **precious eco-friendly material: recycled plastic**.

In fact, if the quality of the trolleys is guaranteed by **advanced and sophisticated production processes, the environmental sustainability is guaranteed by the use of recycled polypropylene** which provides **maximum strength and a long product life**.

Each VDM trolley is accompanied by the **EcoGreen Passport which certifies its unique features**.

ECO GREEN

EcoGreen trolleys make the difference!

RECYCLED
PLASTIC
UP TO 90%

All the production processes, which vary from model to model, have as common denominator the use -where possible- of **recycled plastic**.

*POST INDUSTRIAL RECYCLED PLASTIC

CAM

APPROVED

All the trolleys comply with the Italian CAM regulations.
VDM has chosen to produce in compliance with **CAM (Minimum Environmental Criteria)** - the environmental requirements defined for the various stages of the purchasing process - aimed at identifying the best environmental product along the life cycle.

100%
RECYCLABLE

Each trolley is 100% recyclable.
This means that, at the end of the product's life, each of its components falls within the productive circle, preventing the generation of waste and thus eliminating the environmental impact.

We have achieved important goals, but many new ones await us!

VDM has always given great value to **the certification of its products**. A constant commitment that grows every year, **accompanied by an ever-wider EcoGreen range**!
